**STIL**  
CASING SOLUTION

USE BY MAJORS FILM ARCHIVE WORLDWIDE and RELIANTE BY ARCHIVITS.

**STIL VENTED ARCHIVAL FILM CONTAINER** such top **QUALITY PRODUCT, INNOVATIVE and GREEN.**

Our cans are **specially designed to enhance air circulation** in order to minimize premature film degradation over decade.

**AVAILABLE NOW**

- ✓ **The large openings of the chimneys help for better air circulation and stop by their design water and dust penetration.** As some film containers are claimed to be vented by lifting the lid by means of a few points of the lower half or making holes at the bottom.
- ✓ **STIL Film containers are more than vented.** Our design helps to create an air circulation not only around the film but also above and beneath it.
- ✓ **Chemically inert polypropylene; no addition or substitution.** STIL products are considered **non-hazardous** according to *OSHA* (1910.1200) and meet *REACH European standard*. STIL archival containers and cores are not just Polypropylene, but **high-density Polypropylene with no additives**. Answering to the standards drawn by *ANSI, AIIN or SMPTE*. STIL containers have the best *IZOD IMPACT* (robust & sturdy) in the industry.
